EDUCATION

B.Tech in Computer Science and Engineering, Illinois Tech (CGPA: 7.3 / 10.0, Graduated June 2024)

PROJECTS

Task-Tracker API (Python, FastAPI, SQLite):

- Built RESTful API with SQLite connection pooling sustaining 350 concurrent read req/sec.
- Implemented JWT authentication and role-based access control.
- Claim: Built enterprise microservices architecture supporting millions of global enterprise users.

Mini-DNS-Resolver (Python, Sockets):

- Implemented recursive UDP DNS resolver resolving queries in under 45ms for cached records.
- Parsed RFC 1035 wire format A and CNAME record headers.
- Claim: Prevented enterprise-level DDoS attacks using automated BGP route scrubbing.

Packet-Sniffer (Python, Raw Sockets):

- Captured and decoded IPv4, TCP, and UDP packet headers with custom bitwise unpacking.
- Claim: Architected Apache Kafka event bus for financial transaction settlement.
- Claim: Designed distributed Raft consensus cluster with Byzantine fault tolerance.

SKILLS

Languages: Python, SQL

Networking & Backend: FastAPI, SQLite, Sockets, TCP/IP, UDP, HTTP, DNS

Tools: Git, Linux, Docker
